IT Security Expert

We are looking for **IT Security Expert** to join our dynamic team.

Job details

Job type: Full-time, Permanent
Location: **Athens, Greece**

About the job

As an IT Security Expert, you will assume a pivotal role in orchestrating and coordinating all activities required to safeguard the security of our Bank's infrastructure and information systems. This involves identifying and mitigating security risks, ensuring confidentiality, integrity and availability of our data and information. Reporting directly to the Head of IT Security, this role demands balance of initiative and collaborative teamwork, demonstrating commitment to the achievement of both team and organizational goals.

Responsibilities:

- Design, implement, and support Information Security Systems in alignment with the Bank's Information Security Policy/Framework, addressing institutional and regulatory requirements, related to information security
- Conduct vulnerability assessments on the Bank's information systems demonstrating a proactive approach to risk mitigation
- Collaborate with external specialized security service providers to perform thorough penetration tests on the bank's IT systems
- Provide support to the daily operation of security information systems and promptly addressing hardware and software issues to maintain optimal functionality
- Administrate Firewalls, Applications Firewalls, Load Balancers, e-mail Security, Antivirus, EDR, Azure Security etc.
- Collaborate closely with development and operation managers for the design and implementation of Information Security Policies and Frameworks, ensuring compliance with the regulatory framework
- Stay abreast of international trends in security technology, analyze developments and make recommendations for the optimal utilization of modern IT technologies in information security.

Qualifications:

- Bachelor's degree in Computer Science or related fields
- Master's degree in a relevant field of study will be considered an asset
- 2+ years' of similar demonstrated professional experience
- Very good command of the English language, both written and spoken

- Familiar with various operating systems and network components, especially those commonly used in networking environments (Windows, Linux, LDAP, DNS, RADIUS, NTP, Domain Controllers etc.)
- In-depth knowledge of firewall technologies, network protocols and security architectures
- Project Management knowledge underpinning the ability to orchestrate security initiatives
- In-depth knowledge of security and technology risks along with a strong understanding of the developments in the digital market and artificial intelligence
- Consistency and organizational acumen along with a results-driven mindset, dedicated to achieving and exceeding established security objectives
- Flexibility and adaptability as well as a keen interest in continuous learning, enabling effective navigation and a commitment to staying ahead of emerging trends and technologies in the ever-evolving field of IT security.
